Subject: Consumers right to know, I am a consumer

Sensitivity: Personal

In case you think that we are not concerned about our food supply I want you to know we consumers are very concerned. My concern came about after 4 years of research to find out what is wrong with my children. I found one product that I have proven through test to be the problem and it is supposed to be the most wholesome food on the planet. Milk..... Now I find that not only is it not the most wholesome food on the planet, but that now it has an added downside.. BST Growth Hormone.. Your playing God with our lives, our food supply is one of the most sacred things on this planet, and you think we don't have the right to know. Believe me there is a growing movement in this country, from educators that have seen the problem this growth hormone is causing in schools to parents that are concerned about their children's health. And I can tell you, if you do not inform us,,,we will find out the truth anyway, and when we do it is going to be political suicide for all involved. American consumers are not stupid, and you have no right to treat us as such. You have no right to withhold information from us that gives us the right to make our own choices about our health and the health of our children. We will not stand by and be your guinea pigs.

Thank you,
Linda Way
